PROFESSIONAL SUMMARY

Senior iOS Developer with 5+ years of experience building polished, user-facing features for iPhone and iPad apps. Skilled in Swift, SwiftUI, UIKit, MVVM, and The Composable Architecture (TCA).

PROFESSIONAL EXPERIENCE

Senior iOS Developer

May 2025 - Present

ForesightCares

- Led iOS development at a healthcare startup, building two iPad apps (admin and patient-facing) end-to-end in SwiftUI and The Composable Architecture.
- Architected a modular codebase of 60+ Swift packages and 150+ modules with Swift Package Manager for fast incremental builds, isolated testing, and cross-app code sharing.
- Built a testable, dependency-injected data layer over an AWS AppSync (GraphQL) backend.
- Implemented subscription billing with RevenueCat (onboarding, paywall, and upgrade flows) and integrated Amplitude for product analytics.
- Created a reusable design system optimized for older adults, with large-scale typography and accessible components.
- Integrated the company's internal AI camera feature into the app, owning the client-side integration and data flow.

iOS Developer

May 2022 - Apr 2025

PocketRadar

- Shipped features for the companion app to a Bluetooth baseball radar, spanning player management, speed tracking, and onboarding, in SwiftUI, UIKit, and MVVM.
- Built video playback with real-time speed overlays using AVFoundation, packaged as a reusable internal Swift package for camera and video.
- Built a scalable REST API layer with multi-environment support to manage player data.
- Implemented a local SQLite persistence layer with GRDB, built for SwiftUI previews and unit testing.
- Centralized camera, microphone, Bluetooth, and photo-library permissions behind a single manager.

iOS Developer

Jul 2021 - Mar 2022

Dealerware

- Developed user-facing features for an automotive iPhone app using UIKit and MVC.
- Helped write bug fixes and analyze crash reports as well as diagnose issues in the app.
- Actively participated in Agile development: sprint planning, daily standups, retrospectives, and code reviews.
- Managed sprint tracking and documentation using JIRA, Confluence, Slack, Github and other tools.
- Utilized CI/CD pipelines with GitHub, Fastlane, and CircleCI to automate builds and streamline delivery.

EDUCATION

University of North Carolina Wilmington

Degree in Bachelor's of Computer Science

PROFESSIONAL SKILLS

Programming Languages & Frameworks: Swift, SwiftUI, UIKit, Combine, Swift Concurrency, MVVM, The Composable Architecture (TCA), AVFoundation

Development Tools & Ecosystem: Xcode, Git, Swift Package Manager, App Store Connect, StoreKit, RevenueCat, AWS AppSync, Amplitude Analytics, Jira, Slack
